

Good News Productions, International accelerates global evangelism through media and partnership with His church. Strategies for evangelism and leadership training are developed in cooperation with national church leaders and missionaries. Culturally appropriate media is then produced in the people's heart language to maximize the impact and retention of the Gospel message. GNPI has established ten regional centers, almost exclusively run by nationals, to help you tell "His story." Media tools in more than 100 languages assist local believers in sharing the Gospel. The story is told, the world is touched, the church grows, and evangelism is accelerated!
